Amendments to the Disclosure

Please replace the third paragraph at page 7 lines 25 through 32 with the following paragraph.

The top view of Figure 3 illustrates that the sidewalls of the second scoop adjacent the endwall of the first "U" shaped scoop, are thickened to provide a strong transition and a gusset like reinforcement of the handle to the first "U" shaped scoop. The second "U" shaped scoop is also of a narrow width adjacent the endwall 40 to further stiffen the junction of the handle with the first scoop.
